Vierumäki Golf – Classic Course

The project to implement the Masterplan for the Classic Course at Vierumäki has now come to completion and we are very pleased with the results.

The landscape is so good for the Classic Course with its mixture of heather and pine trees, sandy soil and wonderful undulations throughout. The original layout of the course worked well and did not need any major adjustment. However, the greens are the focus for any course and we found many holes where the green surfaces were either extreme in contouring or very bland and boring. Some of the green surrounds also had some huge mounds around them which looked very artificial.

As a result, the project to redesign the greens, green surrounds, and all of the bunkers was conceived and now implemented. We hope that this will lead to the golfers of Vierumäki enjoying their golf more than they did previously. There are now many good flag positions on the greens which will influence the way that the holes play and will provide some interesting short game recovery shots and putts.
